Amazing photography combined with very well researched and written text, sprinkled with occasional glimpses of the original paintings. However, it and "Monet's Garden" are very similar. I personally liked the latter so much I bought several other of his works, and they all are exceptional.

Derek Fell offers 25 full-color plans to inspire amateur gardeners with modest-size gardens to re-create glimmering planting schemes--both those the Impressionists envisioned on canvas and those they created in reality. The accent throughout is on the practical and achievable. Full-color photographs.
