Joy Bossi, Karen Bastow : The Incredible Edible Landscape before purchasing it in order to gage whether or not it would be worth my time, and all praised The Incredible Edible Landscape:

5 of 5 people found the following review helpful. Awesome!!!By BThis book is full of awesome suggestions!!! Some that I haven't seen anywhere else. Be forewarned though - the writer lives near Salt Lake City, UT so the suggestions are going to be specific for that kind of climate zone. Before I bought the book, I compared SLC's zone to the zone where I live and they were close enough, so I bought the book and am glad I did!8 of 9 people found the following review helpful. More than just a How-To bookBy Lane D. CallahanI bought this book for my wife so she could look up how to grow certain vegetables in our garden. I picked it up one night to look up how to plant grape vines and I couldn't put it down. It is not just a how-to book. It has quotes about gardening. Tips on pruning. The pros of using a raised bed garden. The history of why carrots are orange. Recipes like mock raspberry jam using green tomatoes. And the list goes on. The authors have really jammed a lot of information into this tiny book. It also has fantastic photos. This was a great purchase and I look forward to future books from the authors.0 of 0 people found the following review helpful. Inspiring and instructiveBy Searching for Simple LifeSo many beautiful ideas - I want to get rid of all

my grass now! :)

Do you want your garden to replace the grocery store? Learn how to landscape and maintain a yard that is beautiful, sustainable, and edible. Save time and money as master gardeners Joy Bossi and Karen Bastow help you grow fresh produce right outside your door. Keep your garden in peak condition as well as harvest, store, and preserve the delicious things you grow all around your house.
