Nothing like learning how to make a fire and smith something. Precise instructions written buy an interesting person. There are so many skills that all of us should at least know a little about.

This book teaches the artist and craftsman how to make his own tools: how to design, sharpen, and temper them, using only basic shop equipment and scrap steel. The guidelines offered in this book are identical to the information and explanation given by the author in his teaching. Beautiful, clear drawings are 'picture translations' of his personal demonstrations, showing the step-by-step progression from the raw material to the finished product - the handmade

tool.
