If you are a corporate head without mechanical skills this book is for you (two starts because of that). BTW its kinda of outdated and boring.0 of 5 people found the following review helpful. all contentsBy mallui want a overview of each content in 5 lines each of the boo0 of 6 people found the following review helpful. all contentsBy mallui want a overview of each content in 5 lines each of the boo

A standard in hotel, restaurant and institutional management courses. Contains new chapters on computer hardware/software applications in maintenance and engineering systems as well as grounds management, including signage. Besides a completely revised chapter on heating-ventilation-air-conditioning (HVAC) and expanded material

on energy management, it offers brand new case studies and discussion questions.
