I'm happy with it so farBy D.AalfsThis is my first year using this calendar. I'm happy with it so far.0 of 0 people found the following review helpful. Five StarsBy verenalarsonI've been using this guide for years. It has simplified my life.

The original biodynamic sowing and planting calendar, now in its 55th year. This useful guide shows the optimum days for sowing, pruning and harvesting various plants and crops, as well as working with bees. It includes Thun's unique insights, which go above and beyond the standard information presented in some other lunar calendars. It is presented in colour with clear symbols and explanations. The calendar includes a pullout wallchart that can be pinned up in a barn, shed or greenhouse as a handy quick reference.

'This annual publication is the Bible for biodynamic gardeners and farmers'. -- Network 'This annual publication is the book for those who want to farm and garden biodynamically. There are useful notes for new readers and a number of special features, including this time the care of bees with monthly notes for beekeepers, how to work with biodynamic preparations, a recipe for rye bread and answers to questions from readers concerning potato and tomato culture.' -- David Lorimer, Scientific and Medical Network 'Absolutely essential for all organic gardeners and farmers'. --Cygnus 'This little paperback is essential for all organic gardeners. It is the original annual biodynamic planting guide. Incredibly condensed amounts of information are available [here] ... Illustrated throughout with some lovely photos and clear diagrams.' -- Ysanne Spevack, Organicfood.co.uk 'This little paperback calendar is the original of its kind and essential for all organic gardeners. An established following ensures good sales of this useful guide, which has a special feature on the care of bees.' -- Veronica Leek, The Bookseller Buyers' Guide About the Author Matthias Thun is the son of Maria Thun, the biodynamic pioneer who died in 2012. On their farm in Germany, Matthias is continuing her research into the effects of biodynamic agricultural methods.
