"The Medical Marijuana Growers Guide. NATURES PHARMACY." Is an extensive guide on cannabis cultivation. Learn how to grow medicinal grade marijuana from seed to harvest. This quick start guide starts out with the basics and works up to more advanced growing techniques that will increase quality and yield. The guide is an easy read and wether you are a beginner, a hobbyist or a seasoned professional entering the medical or recreational market, something can be learned from this guide and my 45 years of practical experience. In response to the guide being too general, I decided to update the guide and give you more detail on plant nutrition, bio stimulants and environmental factors that help you achieve the plants full genetic potential. With the information in this book you should be able to hit 2-3 pounds per 1000w light. Turn on your automatic updates and you will receive the updated version. With legalization around the corner everyone should learn how to grow marijuana for its nutritional and medicinal benefits as well as its recreational benefits. Also as a bonus to this guide, I have produced instructional videos that I have published on YouTube. The links are in the guide. Peace And Prosperity For All.
