From Brand: Univ. of Massachusetts Press : The Native Landscape Reader (Critical Perspectives in the History of Environmental Design) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Native Landscape Reader (Critical Perspectives in the History of Environmental Design):

0 of 0 people found the following review helpful. Four StarsBy Bobbi's BooksGreat book. Fast shipping0 of 1 people found the following review helpful. The Native Landscape ReaderBy Florence NickersonThe author includes nature-based works from the 1800's until present. The return of nature being the center of American Literature will raise the

consciousness of the people which leads to protection of the environment, a necessary key to world peace! A must read for those who have a passion for native landscapes. 0 of 1 people found the following review helpful. Keep this on your bookshelf By Marilyn D Jones Insightful and motivating for avid habitat gardeners and others coming to understand the necessity of biodiversity and what individuals should understand.

In this volume Robert E. Grese gathers together writings on nature-based landscape design and conservation by some of the country's most significant practitioners, horticulturalists, botanists, and conservationists of the late nineteenth and early twentieth centuries. Written with a strong conservation ethic, these essays often originally appeared in obscure, short-lived publications and are difficult to locate today, comprising a rich but hidden literature. Over many years of pioneering research into the work of Jens Jensen, O. C. Simonds, and other early landscape architects who advocated for the use of native plants and conservation, Grese encountered and began collecting these pieces. With this volume, he offers readers his trove. Purposely avoiding literature that is widely available, Grese shares as well his experience of discovery. His introduction provides perspective on the context of these writings and the principles they espouse, and his conclusion illuminates their relevance today with the emerging emphasis on sustainable design. This collection will appeal to general readers interested in the issues of sustainability, horticulture and gardening, and landscape design and preservation, as well as to historians, practitioners, and specialists. Published in association with Library of American Landscape History: <http://lalh.org/>

"The relevance of these writings to the current issues of biodiversity, native plants, and sustainability cannot be overemphasized. . . . This extensive collection is a valuable addition to landscape scholarship and practice." Robert L. Ryan, coauthor of *With People in Mind: Design and Management of Everyday Nature* About the Author ROBERT E. GRESE is professor of landscape architecture at the University of Michigan and author of *Jens Jensen: Maker of Natural Parks and Gardens*, which was also published in association with the Library of American Landscape History (www.lalh.org).
