Duane Newcomb : The Owner-Built Adobe House before purchasing it in order to gage whether or not it would be worth my time, and all praised The Owner-Built Adobe House:

0 of 1 people found the following review helpful. NOT RECOMMENDED By Heirlair Collies Not that informative or helpful. 4 of 4 people found the following review helpful. Great book By Dante I like this book. I have to say that within scanning a few different parts of the book I already learned some things I didn't know. Yeah, I know, you get surprises when you actually take the time to read something properly. But seriously, it's a very informative book and I would

definitely recommend it to someone who is interested in learning about this. The author really does take you through the steps and talks about many things that needed to be considered. He even covered how to make your bricks to be able to stand up to wet weather with no damage. Do yourself a favor and get this book. Honestly I would buy it in conjunction with adobe houses for today and the adobe book, or if you don't like those combine it with two you do like. It will be worth it. 1 of 1 people found the following review helpful. Five Stars By Christopher Fernandes Practical information. Must read for anyone wanting to build adobe.

First published in 1980, this book remains a useful guide that will help you build your own adobe house almost anywhere in the country, even in areas not usually considered "adobe country." Duane Newcomb takes you through every step of the process, from selecting a site, obtaining building permits, drawing plans, excavating, and making bricks to adding kitchen cabinets and finishing the interior. The Owner-Built Adobe House details every aspect of various types of adobe houses and includes information on plumbing, electricity, heating and cooling, fireplaces, flooring, and the framing of windows, doors, and roofs. With sixty-six detailed drawings and photographs accompanying the instructions, this book is the basic manual in the field and is invaluable to both the novice and expert homebuilder.

From the Inside Flap A useful guide that will help you build your own adobe house almost anywhere in the country, even in areas not usually considered "adobe country." About the Author Duane Newcomb is the author of several books, including The Postage Stamp Garden Book and The Apartment Farmer. He lives in California.
