By Rosemary Ann Ogilvie
A quick flick through this (Kindle) book was enough to give me a number of options I hadn't even thought of. Reading it now in more depth, I'm finding it's an excellent tool to help you get the most out of a polytunnel or greenhouse - beyond growing hot-climate veg like tomatoes, aubergines, peppers and okra. The monthly action plans are particularly helpful. I'm seriously delighted with it and unreservedly recommend it to anyone new to hot-house food production.

Gives a great over-view of what you can and need to do for the polytunnel by each month. Has lots of great pictures and great ideas, like shelves about eye level and how the different plots are arranged. My polytunnel is 30ft x 100ft and so there is a little size difference. The climate is a bit different here in Kansas, but I can adapt the ideas for my area. We have a lot of wind here and the plastic keeps kept trying to blow off. I love the pictures!

'Until now, there has been next to no information available on how to make the best use of a polytunnel. The Joyce and Ben Russel team have filled that gap, showing us in clear, precise detail how to erect and manage polytunnels, and above all, what to grow in them.' Joy Larkcom
The Polytunnel Book is the most comprehensive, practical month-to-month growing guide to polytunnel gardening available. Whether you are a complete beginner, or a more experienced grower, this book has got what you need including information on:
Preparing the site
How to get the best from each crop
Identifying and coping with pests
Making a hotbed
Composts and organic feeds
Month-to-month planting plans for year-round growing
But at the heart of this book is Joyce Russell's experienced hand guiding you through each month of the year. It tells what to do and when to do it, in order to grow the best fruit and vegetables all-year-round. 300 colour photographs illustrate the wealth of practical tips and techniques as well as celebrating what can be achieved. 'A polytunnel offers a relatively cheap and simple way to tend crops undercover. And Joyce Russel tells exactly how to do it.' Kitchen Garden Magazine

"The huge increase in growing your own has led to a parallel surge in interest in polytunnels, the best tool a serious vegetable grower can acquire. But until now there has been next to no information available on how to make the best use of a polytunnel. The Joyce and Ben Russell team, with their years of practical experience, have filled that gap, showing us in clear, precise detail how to erect and manage polytunnels, and above all, what to grow in them."
