**From CABI : The Potato: Botany, Production and Uses** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Potato: Botany, Production and Uses:

Potatoes are a staple crop around the world. Covering all aspects of botany, production and uses, this book presents a comprehensive discussion of the most important topics for potato researchers and professionals. It assesses the latest research on plant growth such as tuber development, water use and seed production, covers all aspects of pest management and reviews postharvest issues such as storage, global markets, and of course, nutritional value and flavor.

About the Author Roy Navarre is with both USDA-ARS and Washington State University. Mark J. Pavek is Associate Professor, Washington State University.
