I love house plants, but I always managed to kill them. I had no idea how to choose the right plants, but I think this book gave me a greater confidence in my ability to keep them alive and thriving. It is packed with step by step pictures and instructions to make even me successful. I will make great use of it for years to come as a valuable resource for ideas and techniques.

This A-Z guide includes over 350 of the most popular species of house plants. It also provides over 150 design ideas for planters, pots, boxes, baskets and tubs.'
