The Smart Approach to Kids' Rooms-Planning, Designing, Decorating joins the Smart Approach series, which guides the reader through the process of interior design. This book focuses on the needs of children ranging from newborns to young adults. Topics include: how to work with space and color; develop a budget; select age-appropriate themes, furniture, window, wall, and floor treatments; buy a mattress; organize storage; create safe work, play and sleep areas; and plan a room to be shared by two. Easy tips for adding personality with paint or customizing furniture are accompanied by attractive four-color photography or illustrations. Many beautiful photographs of professionally

designed children's rooms give the readers inspiration and ideas to share with their children.
