around his tree house and his living space. It shows how he constructed all of the contraptions like the stove and how he hunted small game and fished. However it would be more interesting if it was a real day to day account with more background. It almost seems like he did it just to make a book about woods living and then move on as he only stayed six months. Some of the information is use full, and one of the things I commend is that he explains up front he was not going off grid for political/environmental reasons and he was not against using power tools to build the house or kill rabbits etc. to eat. So If you can get this book for a few dollars I do recommend it. 0 of 0 people found the following review helpful. great read and full of tips also! By AllisonLove this book, came as a really nice hardcover with great illustrations inc plans for building treehouse, clay ovens, privy, benches etc. Lots of cool tips of how to hunt and forage and good recipes. Loved the patter and understated voice of the author. very amusing. all in all a great new book. 0 of 0 people found the following review helpful. Good, fun read..... By Rockguy30 Many photos, good read....some of it is redundant within the same book itself, but I, still enjoyed it a lot....a very interesting

Nick Weston escaped from the London rat race to live entirely off the land in a secret location deep in the woods. The Treehouse Diaries chronicles his real-life adventure: from constructing a treehouse (complete with hot shower and compost bathroom) to planting a vegetable patch and brewing his own beer. There's practical information on every project he undertook, step-by-step photographs that illustrate the highs and lows of treehouse life, and delicious recipes made from ingredients grown, foraged, and caught on-site! His six-month experience will inspire readers to unplug from the modern world and reconnect with the natural one.

About the Author Nick Weston is a wild food enthusiast and survival expert, well-known for his role on Channel 4's Shipwrecked. Having moved out of his tree house, he now teaches foraging, designs tree houses for various clients, does as much fishing and hunting as possible and is working on plans for his next big adventure.
