Lia Leendertz : The Twilight Garden: Creating a Garden That Entrances by Day and Comes Alive at Night before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Twilight Garden: Creating a Garden That Entrances by Day and Comes Alive at Night:

3 of 3 people found the following review helpful. LEARN HOW TO ENJOY YOUR GARDEN IN THE DARK! By BEB from Georgia If you love evening, moonlight and gardening, this book is wonderful. While visiting Longwood Gardens in Kennett Square, Pennsylvania, an amazing exhibit of moonlight gardening opened my eyes to the beauty of a garden in the dark. Who knew there were so many plants that were visible with very little light. You just need to know which plants to choose. There are silvery leaves, white petals and translucent flowers. Surprisingly, many are

easy to grow! The photos in this book are beautiful and the author provides many helpful ideas to maximize the enjoyment of nighttime in your garden. 2 of 2 people found the following review helpful. Evening in the Garden By Amy Ryberg Nice book. Mostly descriptions / pictures of individual plants to consider for the garden. It helped me rethink focusing parts of my garden, especially the terrace, to look good particularly in the evening. I immediately ordered some new plants. 0 of 0 people found the following review helpful. Five Stars By BillysPixie A present for my mom she loves it!

Covering basic planting and design principles that make the most of outdoor surroundings, this guide helps gardeners establish a unique nocturnal garden. Including chapters on night-scented and night-blooming plants, gentle mood lighting, water features, enclosures, and the use of color and sound to attract wildlife, this is the perfect starting place for gardeners attracted to the ethereal nature of a moonlit landscape, whether they are working with a backyard terrace or a large plot of land. Case studies of formal gardens and detailed horticultural descriptions of night-friendly plant species and varieties divided into Star Plants, Supporting Cast, and Backstage Beauties round out the tools needed to transform a private space into a moonlit paradise.

About the Author Lia Leendertz is a gardening columnist for the Guardian and a regular contributor to Garden magazine, which is published by the Royal Horticultural Society.
