Kristo Pienaar : The Ultimate Southern African Gardening Book before purchasing it in order to gage whether or not it would be worth my time, and all praised The Ultimate Southern African Gardening Book:

This is an illustrated reference book for the gardener. It contains suggestions on how to create seasonal gardens, formal gardens, tree landscapes, herb and vegetable gardens as well as specialist cacti and succulent gardens. More than 2000 plants are discussed. Each entry gives information on the origins of the plant, how to grow it, its appearance, any special requirements and how to propogate it. The book contains descriptions of field trips into natural environments to view plants in the wild.
