Stu Campbell : The Underground House Book before purchasing it in order to gage whether or not it would be worth my time, and all praised The Underground House Book:

1 of 1 people found the following review helpful. In Depth Analysis of an Underground HouseBy Gino B SinopoliI rated this book pretty high, even though I would think some of the material is dated as this book was written and published in the 80's. With newer technology some things are bound to change but this book is a very good in depth analysis of what factors to take into consideration when building a house underground. I wish they would have given more examples of designs that had been completed. This might be better for someone who is more exposed to actual design and construction terms as some of the wording and examples used in the book might be a bit deeper than most people are looking for in a book.This book coupled with Homes in the Earth by L.S. Chalmers is a great combination.2 of 2 people found the following review helpful. Comprehensive overviewBy StinkyI had one of these books back in the 80's and was delighted to find a good used one on . This book will take you through some of author's experiences with underground houses as well as some historical examples. There are drawings and explanations of the various types of underground structures. You will then see the stories of some real life homes and their owners complete with photos. This book also includes tables and other technical data relating to energy savings. This is a must have for anyone interested in alternative construction and energy savings.0 of 0 people found the following review helpful. You owe it to yourself,to consider thisBy Kevin L. MccuneStu adds His expertise to this subject and judging from His work,I'd say we all should consider building like this(no exterior maintainence,no gutters to clean.etc) I 've got better things to do with my time then house maintainence-Kevin

1980 gardenway large paperback by stu campbell, a library discard with attendant pocket in back, stamps and sticker on spine. heavily used and worn, creased, otherwise unmarked. I package carefully, send right away, including giftwrap and a hand drawn bookmark.
