1 of 1 people found the following review helpful. Very helpful and reliable instructions.By ojait2I am so glad I purchased this book. The author writes about pertinent facts in great detail. His instructions are clear and very helpful in all phases of residential construction. Larry Huan's 30 + years building houses can be plainly seen from the insightful drawings and related photo's on each page. The books title is evident through every chapter where the author tries to speed up the construction in the most proficient way possible. For more information on the author his video's

Here's your chance to become a more efficient carpenter. Larry Haun has been a production framer for more than 35 years and a teacher of apprentices for more than 20. In this book, Haun shows you, step by step, all the techniques he uses to frame a basic house, from laying down the sills to cutting the rafters. You'll learn about: cutting and installing posts and girders joisting and sheathing fluently laying out, cutting, assembling, and raising walls framing gable roofs, hips and valleys, and truss roofs building various types of stairs There is an opening chapter on tools, plans, codes, permits, lumber, and materials, and additional information throughout the book on safety and site-built tools. The Very Efficient Carpenter is no less than a complete course in basic framing.

About the AuthorLarry Haun has worked as a carpenter in southern California for four decades and has been a Habitat for Humanity volunteer since the 1980s.
