**E. Charles Nelson : The Wild and Garden Plants of Ireland** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Wild and Garden Plants of Ireland:

The watercolors of award-winning botanical artist Wendy Walsh portray a personal selection of the plants that grow wild in Ireland or are cultivated in Irish gardens. They are accompanied by the lively storytelling and accessible horticultural descriptions of botanist E. Charles Nelson. The great gardens, famous plantsmen, legendary journeys, and natural phenomena that have shaped the flora of Ireland are illustrated and described in thematic selections. 100 color illustrations

About the Author E. Charles Nelson is a distinguished botanist who has written numerous illustrated books on Irish

flora. He worked for many years at the National Botanic Gardens, Glasnevin. Wendy F. Walsh is one of Ireland's premier botanical artists, internationally recognized for her paintings of Irish flora.
