**Melinda Myers : The Wisconsin Lawn Guide: Attaining and Maintaining the Lawn You Want (Guide to Midwest and Southern Lawns)** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Wisconsin Lawn Guide: Attaining and Maintaining the Lawn You Want (Guide to Midwest and Southern Lawns):

0 of 0 people found the following review helpful. A 'must read' for anyone charged with the responsibility of lawn care for a Wisconsin propertyBy Midwest Book ReviewLawns are deemed an essential element for any home landscaping

design. The types of grass that flourish best in Wisconsin's horticultural zone, varied soil conditions, and climate are superbly presented in depth and detail by horticulturist, gardener, and lawn specialist Melinda Myers in "The Wisconsin Lawn Guide", a 159-page compendium of information, advice, commentary, and resources. Featuring the best grass varieties to be employed in a Wisconsin environment, "The Wisconsin Lawn Guide" also features a maintenance schedule for a well kept lawn, detailed and illustrated explanations of methods for planning new lawns, renovating existing lawns, dealing with commonly encountered lawn problems ranging from weeds and diseases to insect pests, the role of fertilizers, watering, and mowing. Enthusiastically recommended for personal, professional, agricultural school, and community library collections in the Badger State, "The Wisconsin Lawn Guide" should be considered a 'must read' for anyone charged with the responsibility of lawn care for a Wisconsin property, be it urban, suburban, or rural.

The Lawn Guide Series takes the mystery out of lawn care and maintenance. The book describes how to properly plant, fertilize and water as well as recommendations on how to address the inevitable lawn problems.

About the Author Myers is a nature and gardening writer whose specialty is attracting wildlife, especially birds, to the garden. She contributes regularly to the magazine *Birds and Blooms*, and lectures widely on creating gardens that please both human and avian visitors. She is also a teacher and consultant, with over 20 years of experience in the field of horticulture.
