William BenitezI looked up Spike's name because of an article I'm writing about a large carving I did years ago with a Dremel. Spike was not a great writer but he was definitely a master woodcarver with a Dremel. This book was published 36 years ago long before the POD self publishing age. It is a short, stapled binding book but the content was invaluable for someone who wanted to learn how to use a Dremel for carving and helped me carve many nice pieces. I highly recommend both of Spike's book to anyone interested in woodcarving with a Dremel or any rotary tool. The carving I am writing about appears in the photo and the eagle is one of Spikes designs.

This softcover staple back book has patterns and instructions for carving your own dime store indian, old shoe, eagle and more. It also explains the very basic- what a wood carving tool looks like and how to make basic cuts. The retro

sensibility of the showcased designs, along with diagramed instructions makes this a highly coveted book.
