William Hjortsberg : The Work of Art: A JLF Associates and Big-D Signature Collaboration before purchasing it in order to gage whether or not it would be worth my time, and all praised The Work of Art: A JLF Associates and Big-D Signature Collaboration:

Before there was a house, there was a place. Raw, untouched swaths straddling a foundation tens of millions of years in the making. Beckoning with promise. Shaped by seasons. Witness to weather. Looming peaks and rolling valleys brimming with life-force. Amidst these fertile landscapes a seed was sown. Pieced together with a pioneering verve-one beam at a time, stone next to stone, one brick shouldered against the next-a roof and four walls emerged along with the architecture of the American West. From utilitarian function to structural works of art, these archetypal ingredients are essential to the JLF Design Build process. Through distinctive building materials and avant-guard technique, an award-winning perspective was born. Today, we are a collaboration of architects, artisans, woodworkers, stonemasons, blacksmiths, creators, dreamers, philosophers, and pragmatists-delivering more than three decades of timeless structures rooted in integrity and simple elegance. With a footprint that spans rocky mountain landscapes to bucolic expanses of eastern bearings, JLF Design Build has contributed its mark to an anthology of iconic place-based architecture. Powered by inspired design and an exacting eye for placement, our ethos stems from a unity of nature, beauty, balance, and imagination. Welcome to The Work of Art -a continuum of a process that knows no limit.
