Joseph De Chiara, Julius Panero : Time-Saver Standards for Housing and Residential Development before purchasing it in order to gage whether or not it would be worth my time, and all praised Time-Saver Standards for Housing and Residential Development:

0 of 0 people found the following review helpful. Hard to readBy Triple Mommy ArchitectI am a little disappointed from this Time-saver version. I have gotten nothing but positive things to say about other Time-savers, so I just went ahead with this one. The pictures are so hard to read. The drawings look so tired and a bit messy at times. However, if this is the only option you have, then go for it. There are definitely a lot of information in this book on mid to high density housing development plans.0 of 0 people found the following review helpful. Five StarsBy echeprOutstanding and good shipping9 of 10 people found the following review helpful. Essential for anyone involved with the built

environment. By A Customer Have you ever been enthralled with those thick, illustrated books that line the shelves of every architect's office? This isn't one of them...it's sitting open next to their CAD station. I have few books that have followed me from college into practice, but this revised edition has assisted the design development of many residential projects and earned me high marks with my project managers.

Housing represents by far the largest segment of the construction industry. This design reference features, in graphic and text mode, emerging trends in housing design and technology, new forms of multi-unit housing, new demands from housing owners (such as the home office) and new zoning and controls on site size and location.

About the Author Julius Panero (New York, NY) is an architect and interior designer and partner in the firm Panero Zelnik Associates. Joseph DeChiara is a practicing architect and planner. Martin Zelnik (New York, NY) is an architect and interior designer and partner in the firm Panero Zelnik Associates.
