**Julius Panero, Martin Zelnik : Time-Saver Standards for Interior Design and Space Planning, 2nd Edition** before purchasing it in order to gage whether or not it would be worth my time, and all praised Time-Saver Standards for Interior Design and Space Planning, 2nd Edition:

0 of 0 people found the following review helpful. Most useful college textbook for design studentsBy GraceThis book was one of the most helpful books I used while getting my interior design degree. It has codes, ADA standards, and history of furniture and architecture. It's by far the biggest textbook I had to use in college, but highly recommend it for anyone who is getting their design degree, even if it's not required- it really is the only book you'll return to time and time again.0 of 0 people found the following review helpful. Four StarsBy ZZgreat book for interior design.

However, it kind of outdated for the working space!1 of 1 people found the following review helpful. Essential for the Lay Person. By Pen Name and That A Having a hand in designing your own office? Buy this book. Does it matter if you are in a metric country or use feet and inches? No, it does not. Want to know how high the desk should be? Want to know how big the office should be? Want to know how big to make the circulation areas? Given the price of the fit out, this book will save you a bucket of money, even if you are a lay person. There are lots of books that just give you the vibe. This book gives you the measurements.

The "Silver Bible" -- thoroughly revised, updated and redesigned Interior designers, architects, and other design professionals can still turn to the fields beloved "Silver Bible" for a wealth of information related to the design and planning of residential and commercial interiors. But now, Time-Saver Standards for Interior Design and Space Planning, Second Edition goes even further to truly make the classic interior design reference the standard in its field. From standard furniture dimensions to architectural woodwork details, you'll find a vast array of time-saving data and details. Editors Joseph DeChiara, Julius Panero, and Martin Zelnik have brought together contributions from well-known architectural and interior design firms to give you details derived from actual designs and working drawings, showing various solutions for typical design problems encountered in interior architecture. You get a wide range of typical layouts and residential spaces, offices, conference rooms, and reception areas, in addition to details of bars, restaurants, and public toilets. This exciting new edition includes new international examples and metrification and provides you with full coverage of healthcare spaces, educational spaces; home offices; videoconferencing spaces; green design; project forms and schedules. Two outstanding sections cover historic styles and woodworking.

From the Back Cover Interior architectural details, planning standards, and reference data, for use by architects, interior designers, space planners, facility managers, builders, and design students. Long recognized as one of the most comprehensive architectural and interior design reference resources and known as the silver bible, this new edition of Time-Saver Standards for Interior Design and Space Planning is an excellent source of easily accessible design criteria, planning standards, and technical guidelines. The vast array of design information, all contained in a single volume, facilitates and expedites the completion of programming, preliminary planning, design development, and working drawing services. This updated and revised edition of Time-Saver Standards for Interior Design and Space Planning serves as a primary source of information for all design professionals. Organized in an easily accessible format, the book contains key criteria useful to every design professional and builder involved in the planning of a large variety of interior projects. It includes, among other changes, entirely new sections dealing with healthcare spaces, hospitality spaces, banking spaces, conference centers, and accessible design, featuring the latest ADA design requirements. Moreover, many of the existing sections of the book have been significantly expanded to include such new material as design and planning criteria for video-conference spaces, as well as a host of additional lighting design details, workstation configurations, and reference standards. \*Accessible Design \*ADA \*Architectural Woodwork \*Audio-Visual Systems \*Auditoriums \*Banking Spaces \*Bars Restaurants \*Bedrooms \*Ceiling Types Details \*Classrooms \*Closets \*Coat Rooms \*Conference Centers Rooms \*Construction Details/Interiors \*Department Stores \*Dining Rooms \*Elevators \*Fabrics Furniture \*Floor Wall Coverings \*Furniture Hardware \*Healthcare Facilities \*Home Offices \*Hotel Rooms Suites \*Human Factors \*Indoor Recreation \*Institutional Interiors \*Interior Architecture \*Kitchens \*Libraries \*Lighting \*Marble Finishes \*Mathematical Tables Formulas \*Motels \*Nurseries \*Offices Office Planning \*Partition Types \*Planning Standards \*Primary Care Centers \*Programming Standards \*Ramps \*Reference Standards \*Residential Design \*Restaurants \*Retail Spaces \*Revolving Doors \*Shops \*Signage Graphics \*Space Planning \*Stairs Ramps \*Stores \*Theaters \*Universal Design \*Wheelchair Lifts \*Window Treatments \*Wood Veneer Finishes About the Author Joseph DeChiara (New York, NY) is a practicing architect and planner.
