JonesThis book contains practical info about choosing a smaller house. You won't be able to build a house from this book, but it will help you figure out what you want and

how to get it. The houses described are small, but not so extreme as to be unlivable. These houses occupy the "just right" niche that makes them affordable and environmentally sound, but still be livable. BTW- I live alone in a 700sf house. I could be comfortable in half that space if my house were better designed. 2 of 3 people found the following review helpful. A Tiny Home To Call Your Own By Deni O This book provided some very useful information on creating an affordable home for my retirement years. The scale-down version of a home of your own is not only practical but efficient and can be utilized in low income or retirement settings. I would suggest this to anyone looking for an alternative to owning their own home and keeping it affordable and enjoyable.

Impress your neighbors with style and freedom rather than with larger-scale impersonally built square footage. Small is beautiful in housing. Smaller scale homes can be more livable, cozy, magical, homey, enjoyable, low maintenance and easy to clean. They can be more affordable and socially responsible than the current trend of McMansionization; that is chewing up our farm land. Some tiny homes can be built on existing lots without requiring new land purchase. You can live in an attractive, appealing, upscale house AND have a home that is quality built, architecturally beautiful, highly marketable and profitable. Uses for tiny homes include: A home for anyone who wants less space to take care of in exchange for more time, freedom and money. As a personal getaway away space As a tax-deductible home office, professional work space, writer's or artist's studio, As a rental for passive income. For an elderly parent, student or return-to-the-nest kid to have an independent place of their own, yet be close by. Tiny Homes is leading a grass-roots movement toward smaller homes. It shows that small is beautiful in housing.
