Andrew Morrison, Gabriella Morrison : **Tiny House Designing, Building, Living (Idiot's Guides)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised **Tiny House Designing, Building, Living (Idiot's Guides)**:

0 of 0 people found the following review helpful. Four Stars By CustomerGave for a gift - he is really interested in pursuing this idea. 0 of 0 people found the following review helpful. Five Stars By Cynthia Johnson Beautiful book..great ideas..very helpful 13 of 15 people found the following review helpful. A VERY good book written by two respected leaders of the Tiny House Movement By Tom P.If anyone is qualified to write such an excellent book about tiny houses, one aimed at idiots like me... it's Andrew and Gabriella Morrison! True movers and shakers in the growing Tiny House Movement, Andrew and Gabriella were instrumental in leading a team of like-motivated activists to do something remarkable in 2016: Putting together a super well-thought out case in support of adding a Tiny House appendix to the 2018 International Residential (Building) Code. There was nothing to support tiny houses in previous versions of the IRC, and when this brave (and tiny!) team made their case to the top committee of the IRC, they accomplished something truly heroic and historic: They WON their case! And now, as a result of this group's hard

work, starting with the 2018 edition of the International Residential Code, there will be a building code Appendix dedicated to Tiny Houses! This might not seem like such a big deal to a lot of people, but in terms of what it means for the acceptance and success of the Tiny House Movement around the world, it's absolutely HUGE!! Andrew and Gabriella, THANK YOU for helping to bring to America and the world some things it really needs; a possible solution to the shortage of affordable housing and a very earth-friendly way for people to enjoy living a life without a pile of mortgage debt in a huge house filled with STUFF! You are helping to make the world a better and happier place! Oh... and this Idiot's Guide you just wrote about Tiny Houses? I finished reading it today, cover to cover. It's helpful, thorough and excellent! I now proudly consider myself an Advanced Tiny House Idiot! Thank you!

Do you have what it takes to live tiny? Take the first step to achieving the dream of designing, building, and living in a tiny house (typically between 100-400 square feet). *Idiot's Guides: Tiny House Designing, Building, and Living* is the one-stop guide into this innovative concept of minimalist living. Dozens of helpful images and a full-color insert displaying different types of tiny houses help you visualize your dream. The book explores what it mentally takes to become a tiny house dweller and covers the best approach to designing and building a house that ideally fits your needs. The book includes an in-depth discussion on foundation types, financing and insurance, and legal standards, as well as building techniques, must-have utilities, and going off the grid, and home placement. Functional suggestions for decor, storage, and more are also featured. Bonus: three tiny house floor plans to illustrate what these homes entail.

About the Author Andrew Morrison, a professional builder for 20 years, is a leader within the tiny house movement. He has a degree in construction Technology from College of the Redwoods, and is the construction expert for TinyHouseBuild.com. Andrew has also created several instructional DVD series including the "How-To Guide to Building a Tiny House" set. Gabriella Morrison has lived in all types of housing from an oceanside mansion in Rio De Janeiro, to an 80 sq. ft. rustic historic log cabin in the Colorado mountains, to everything in between. She's been involved in the construction trades for 20+ years and been involved in everything from remodels to new construction. She helped co-design and co-build hOMe, the Morrises 207 sq. ft. tiny house on wheels.
