It has the perfect balance of photos and text and tons of useful tips for how to replicate the styles you love in the book. As with a fabulous novel, I am taking each section very slowly, savoring the text, studying the details, and trying to figure out how to make everything work for my new house. The other reviewer is right--it is very much like a magazine, rather than an interior design text book, and this is a good thing. It's an entree into the homes of some of the most creatively minded people out there. What's best is that a lot of different styles are represented, it's not all the starkly metal modern of Metropolitan Home or the flouncy romantic cottage style of Country Living. If you're bored w/ the Pottery Barn cookie-cutter look and are after fresh ideas, look no further!5 of 6 people found the following review helpful. Read it in a dayBy KDiNobileI loved this book so much that I read it in a day. It profiles entrepreneurs and takes you inside their homes and explains their different styles, techniques and inspirations. Those profiled range from product designers to shopkeepers, photo stylists and interior designers. Great source of inspiration and ideas from a variety of perspectives.0 of 1 people found the following review helpful. good resource bookBy kaygood resource book
