Alireza Sagharchi, Lucien Steil : Traditional Architecture: Timeless Building for the Twenty-First Century
before purchasing it in order to gage whether or not it would be worth my time, and all praised Traditional Architecture: Timeless Building for the Twenty-First Century:

0 of 0 people found the following review helpful. Four StarsBy Daniel W. Le RoyGreat book for reference to architects around the world0 of 0 people found the following review helpful. great pictures and a world tour!By Peter P. DobrowskiWell written, somewhat detailed, but I loved the pictures and the world tour they give3 of 4 people found the following review helpful. Modern Version of Traditional Arc...By NYFBContemporary traditional designs I guess means projects with traditional architecture on the exterior that include pitched or angled roof instead of flat roof but with interiors colors toward the lighter shades that are not really traditional but yet contemporary, modern and

certainly not dark, very entertaining with finishes and moldings used in traditional designs when there are hardly any in contemporary designs which are accomplished in a very creative but yet comfortable living in a timeless fashion, a dream for many who want to impress not only their senses but their visitors as well. Famous architects with some 100 plus projects from around the world ranging from public to private to residential to institutional, in Guatemala, North Carolina, Cambridge, England, Romania and even Saudi Arabia. Great articles and images which can be entertaining and educational especially if you are putting your own project together. It costs more in Wal-Mart.

A comprehensive overview of current trends in classicist and vernacular architecture. This book presents 130 projects that reconsider what it means to practice as a traditional architect in the twenty-first century, including a substantial body of work from non-Western countries as well as work by contemporary masters of classical design such as Robert A. M. Stern, Allan Greenberg, Andrs Duany and Elizabeth Plater-Zyberk, and Quinlan and Francis Terry. The projects assembled here highlight the awareness of a sustainable localism and the continuity of traditional building crafts on a global scale and reveal the resilience and originality of traditional building cultures despite the enormous economic and cultural pressures of contemporary development. This is an optimistic vision of a new breed of traditional architects who endeavor to enrich the future while honoring the past.

About the Author Alireza Sagharchi, R.I.B.A., is the principal of Stanhope Gate Architecture+Urban Design. Lucien Steil is an architect and academic who has worked with Lon Krier and Maurice Culot in Brussels at the Archive d'Architecture Moderne and has been a visiting critic at universities in Europe and North America. HRH The Prince of Wales established The Princes Foundation for the Built Environment to improve the quality of peoples lives by teaching and practicing timeless and ecological ways of planning, designing, and building. Lon Krier has taught architecture and urbanism at the Royal College of Arts, in London, and at Princeton University, Yale University, the University of Notre Dame, and the University of Virginia. He received the inaugural Richard Driehaus Prize for Classical Architecture.
