Jean C. Echols : Tree Homes: Teacher's Guide (Great Explorations in Math and Science) before purchasing it in order to gage whether or not it would be worth my time, and all praised Tree Homes: Teacher's Guide (Great Explorations in Math and Science):

1 of 1 people found the following review helpful. Neat bookBy C. GohlinghorstKeep in mind this is really geared to the 5 and under crowd. I like that it uses a variety of materials, including cardboard boxes.3 of 4 people found the following review helpful. Integrated Thematic LearningBy Karen CoxThis book is a great teacher resource book for learning about animals that live in trees. I use it with my Pre-K kids during our forest animals unit. The lessons include a raccoon puppet and an owl art project, but this guide is more than just a craft instruction book. The children will learn all about raccoons and owls and other animals before making each project. The art and science lessons are very well integrated. Many of the animals also have large pull-out posters to use during discussions.
