Our Favorite Book of Elf Houses!By silver elvesWe have had this book for years and it is one of the few that has moved across country with us twice and beyond the pond to Hawaii. We have kept it because we love trees and tree houses, and it has sweet drawings of a variety of creative tree houses with stories, poems, and great instructions for building them. We admit that we have used this book for dreaming of tree houses that we would love to build and live in and that we have not ever actually made one (what can we say except that we are elves and love dreaming). But if you are interested in making one, this book has specific instructions and mechanical drawings for building a number of magical tree homes, including our favorite is a tree house that is a book loft with a bookshelf from floor to ceiling. And there is more in this enchanting book besides how to build tree houses. We picked it off our shelf just a few days ago to read up on how to make an aeolian harp.The Silver Elves,authors of The Elven Tree of Life Eternal: A Magical Quest for One's True S'Elf
