Should be titled Modern Tropical Living as I was expecting more tropical, rustic, bamboo and wood style but this was very poorly put together far too concrete not tropical in my eyes, only the cover picture showed exotic tropical living design but as for the rest there was minimal tropicalism.

Who has never dreamt of living in the tropics? Lying in the sun, enjoying the peaceful atmosphere, sitting under the

cool shade of abundant vegetation just like finding a place in paradise. This new release features a beautiful range of residential architecture and designs from Costa Rica to Florida, from Thailand to South Africa. Every project is an invitation to feel good and relax with swimming pools, open-air spaces, as well as thoughtfully designed interiors of indigenous materials and local elements. This volume displays a breathtaking series of inspirational exotic settings. With their refined esthetics in timeless spaces, whatever their shape or size, all selected tropical dwellings are true dream homes.
