Beautiful book!!!By BAMI first previewed this book at Barnes Noble and knew I wanted to own it. I waited for a price reduction and purchased it at .The homes are high end, but I still came away with a few details I can incorporate into our new home. Their work is an art form. I wish I could afford to have the Bassenian Lagonia architecture team draw our plans. I even contiplated calling them to see how much they would charge for a one hour consultation to look over my pencil sketches before we take my scribbles to a draftsman.This book offers a delightful escape. The photography is very well done and if you enjoy design and art books, you will enjoy this book. It is a keeper and will remain in my library.0 of 0 people found the following review helpful. Beautiful Tuscan Design InspirationBy BeckWhat a beautiful book this is, and it became part of our design inspiration for the new Tuscan house we are building.When starting to work on the design concept for our new home a friend loaned his copy of this

book to us along with several others. My husband and I both loved the book and the houses in it, and I bought a hard-bound copy for us to keep. Later, while my brother-in-law was borrowing our copy, I bought an additional paperback copy which I have continued to carry around in my car while we are building our Tuscan home. I also bought copies for our custom builders, and we found that our home designer and our decorator were already familiar with the book and had copies of their own. For anyone planning to build either a Tuscan or a Spanish inspired home, I highly recommend this book.

The most popular Tuscan Home-Design book ever published is now available in Paperback! The Hardcover version of this book spent 100 weeks on the National Bestseller List! Dazzling beautiful, this book is a tour de force of twenty Old World-inspired homes designed by Bassenian/Lagoni Architects of Newport Beach, CA. Built in the canyons and along the costs of California, as well as the deserts of Nevada, these homes echo the architectural forms, textures and motifs of structures built in the hill towns of Tuscany and the plains of Andalusia. Inspired by the architecture of Southern Europe, yet totally new, these graceful, time-tempered homes display contemporary floor planning, the finest amenities and state-of the-art technology. The volume includes over 250 glorious color photographs of exteriors and interiors, as well as detailed floor plans and site maps of twenty different homes. Special sections entitled It's In The Details offer close-up views of architectural forms, materials, colors and layouts that offer expert advice on planning, designing and appreciating Tuscan- and Andalusian-style homes. For consumers, this remarkable book will serve as a valuable resource of ideas for design, landscaping, interiors and furnishings created in the Old World style, but with a California twist. For professionals and students, this collection will provide examples of innovative floor planning, adept use of forms and materials, and execution of a comprehensive design vision that has become the hallmark of Bassenian/Lagoni Architects.
