By Roger Farnham
From cover to cover (and printed on recycled paper) this book explains the environmental movement in great detail. Everything from the latest recycling technology to "green" funerals is included in this book. If you are at all interested in the planet Earth and what is being done to fight waste and pollution this is the book for you. If you are not particularly interested in ecology and the green movement then you will be bored.

When Uncle John emerged from his composting solar outhouse, he wondered aloud, Who were the first environmentalists? How are plastic shopping bags turned into park benches? What's my carbon footprint? Next thing we knew, the diligent staff the Bathroom Readers' Institute was working on a brand new Bathroom Reader to answer all of Uncle John's questions. Find the stories behind...
* Whatever happened to the electric car?
* The meaning of "organic"
* Not-so-green Hollywood movies
* Ancient environmentalists
* Living on an Amish farm
* Animals that recycle
* The power of poo
