Liz Bauwens, Alexandra Campbell : Upcycled Chic and Modern Hacks: Thrifty ways for stylish homes before purchasing it in order to gage whether or not it would be worth my time, and all praised Upcycled Chic and Modern Hacks: Thrifty ways for stylish homes:

Upcycling sums up todays approach to interiors. It means re-using or re-styling things in an innovative and contemporary way, transforming an older piece of furniture from junk to fabulous. The same idea can even be applied to mass-market modern furniturethrough "hacking," you can give it a brand new use or an entirely different look. Both upcycling and hacking are about re-purposing, taking an inexpensive item and re-working it into something special and unique. Its not just about making the most of your budget, although upcycling and hacks will save you money. Its about having a home that reflects your style and individuality. Sometimes its just a question of looking at "that old thing" in a different way, such as hanging an empty picture frame on the wall, using a piece of outdoor furniture inside, adding different doors to chain-store fittings, or combining traditional and modern in quirky, individualistic

ways.
