A very good and professional bookBy Yuen King TongBe frank I bought the book but never studied it seriously. Yet, I have no doubt to recommend it to anyone who are interested in the actual making process of upholstery. It tells you the details and gives a very solid learning even you are interested in making the stuff. I doubt if the technical school should recommend it

for their student learning furniture making. After all, it is a good book.

You get the benefit of a professionals accumulated knowledge, arranged alphabetically for easy reference, on canework; webbing; stuffing materials and techniques; pipings, buttons, tufts, and nails; fabrics and linings; gussets and gathers; and health and safety concerns. Inspirational and instructive anecdotes, plus traditional sayings from the business, provide a real insiders view of the craft.
