Urban Suburban Meadows, Bringing Meadowscaping to Big and Small Spaces is an enticing introduction to meadowscaping. Author and photographer, Catherine Zimmerman, combines her expertise in photography, storytelling, environmental issues, horticulture and organic practices to offer meadowscaping as an alternative to reduce monoculture lawns. Zimmerman crafts a guide that provides step-by-step instructions on organically creating and maintaining beautiful meadow gardens. Four experts in meadow establishment lend their knowledge for site preparation, design, native plants, planting and maintenance. The book provides plant lists and resource sections for

nine regions across the United States along with local sources to assist the meadow creator in bringing diversity back to urban and suburban landscapes. Meadows can be big or small, short or tall. However large, the benefits are great. Meadows sequester carbon, retain water, filter pollutants, eliminate the need for fertilizers or pesticides and provide habitat for wildlife. Reduce your carbon footprint. Improve your neighborhood. Enjoy a meadow in your backyard! Now available, the 60-minute companion video!
