**D.A. Summers : Waterjetting Technology** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Waterjetting Technology:

Waterjet technology is used in a variety of industries including civil engineering, mining, geotechnical engineering, tunnelling, defence, construction and conservation. This book is essential reading for all those engaged in waterjet technology - from manufacturers of the equipment through to Government Contracting Officers who let the awards, to

the individual contractors and their engineers.
