Just okay By sharon johnson I wasn't that impressed. I was looking more for growing in AZ. I felt this focused more on CA. Many of these ideas would not work here. Nice pictures though. 0 of 0 people found the following review helpful. Good ideas. By D. McDermand Covers all Western climates from hot, arid Arizona to cool, wet Washington. Besides lots of info on appropriate plants for each region there are many ideas for structures to compliment your landscape such as decks,

arbors, gazebos, paths, patios, ponds, walls, rocks and more. Covers factors to consider when making your plan such as erosion, prevailing winds, need for privacy, protection from sun, etc. plus lots of sample landscape layouts. A good book to browse then delve into the areas that are applicable to your area and that interest you. Even though the plants you can use depend on your specific climate the layout designs and structures could be implemented anywhere.
