Hal Marcovitz : What Is the Future of 3d Printing? (The Future of Technology) before purchasing it in order to gage whether or not it would be worth my time, and all praised What Is the Future of 3d Printing? (The Future of Technology):

3D printers are already being used to create clothing, cars, houses, and even human organs. Huge changes in manufacturing, medicine, transportation, architecture, and other areas of modern life are likely to take place as a result

of advances in 3D printing.
