**Fine Homebuilding, Taunton Press : Windows and Skylights (Best of Fine Homebuilding)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Windows and Skylights (Best of Fine Homebuilding):

0 of 0 people found the following review helpful. Great Book for the Craftsman By Clemuel. Like everything from Fine Homebuilding, this is the best. A collection of articles, some a little dated, that give a craftsman some great ideas for window construction. If you are making windows, the expense of this book is negligible compared with the hints and ideas that you'll receive. Mr. Fixit? This will probably be over your head. You'll need real tools for this work, not Home Depot junk. 0 of 0 people found the following review helpful. ... a little misleading - thought this would have more useful how to info By Renovation Mama Description was a little misleading - thought this would have more

useful how to info.0 of 0 people found the following review helpful. Needed windows for my new home.By J. L. SmithI'm building a 1900sq ft home and refuse to spend thousands on premade wood windows. (couldn't afford the house if I did) After much research I find window construction books are few and far between, this is just the ticket. Has down to earth building details, not just those out of the world extravagant windows but basic classic wooden windows of all types which I feel confident will be finished by spring.

Here are trade secrets for choosing the best new windows, restringing double-hung windows and installing and building skylights. How-to articles on how to build shutters and window frames and how to install casement, bay, and arch-top windows are also included. Full color.

From the Back CoverHere is professional advice about installing, building and renovating windows and skylights that you won't find anywhere else. This collection of articles from Fine Homebuilding magazine will show you how to choose the best new windows; restring double-hung windows; build a skylight from common materials or install a manufactured skylight; build shutters, window frames, casement windows and bay windows; and install arch-top windows. Since it began publication in 1981, Fine Homebuilding has been the magazine of choice for builders and homeowners interested in working smarter, faster and better. "The Best of Fine Homebuilding" series organized the most useful articles from the first 100 issues by subject. Whether you are working on your own house or in the building trades, you will find the field-tested information you need right here.About the Author"Fine Woodworking "was launched in 1975 in response to the lack of quality woodworking resources available. With a circulation of 287,000 woodworkers of all skill levels, the magazine has become the #1 source of how-to information on techniques, tools, finishing, and inspiration. Since 1981, the pages of" Fine Homebuilding" have inspired and instructed people who care about quality of home improvement and construction. With a circulation of more than 300,000, the magazine is the premier source for information on how to build projects better, faster and more efficiently.These tips have been collected from articles and columns in Threads magazine. Threads provides in-depth sewing information and inspiration in an engaging, accessible format. Each issue is filled with creative ideas, technical expertise and resources to help readers improve their sewing skills and express their individual style."Fine Woodworking "was launched in 1975 in response to the lack of quality woodworking resources available.
