We visited the small towns in Kansas after reading the story. I hope they make a movie about the turn of the century in Kansas. The University of Kansas has published a history of bringing the railroad hub to Horton, Kansas which is 6 miles north of Muskota. I bet that is what

brought our family from Arkansas to Kansas. 1 of 1 people found the following review helpful. Real Life Real World By Ed the Historian When I first read this book I realized I was hearing from someone that was really "telling as it was" It is Raw, it is Real and it is something that everyone should read, need to read about a time in the USA and one individual's early years. This is real life currently for many people all over the globe. The story is told with humor, honesty and in a way of the great story tellers. I hope that there will be follow on books that will document the life of this real human, who you will want to get to know. Buy books and give them to friends for the long winter months, they will thank you over and over for introducing them to this author! 1 of 1 people found the following review helpful. More than I thought about. By Karen I received this book addressed to my Dad with a personal hand written note to him from the actual Author (They went to school together I found out later). Since my Dad had passed this year I wasn't sure if I should read this book as it wasn't addressed to me. But I did read it and I will tell you it re-confirmed what I have heard through my Dad's family stories of the life and times in South-End St Joseph. It is a most truthful book and I enjoyed reading it. As a post-note I talked to the Author and he is working on a second book. I can't wait to read it.

A coming-of-age story of a boy during the Great Depression.

About the Author I was born dead but survived. I wrote this to let my descendants know their heritage. My autobiography goes until age 19. I plan to write two more books.
