This is an odd book, it seems to be written by someone who has never written a book before. While there is some good information for beginners there are questions that the author asks but never answers. Some statements are very vague and pertain only to the author's trees. Some 'sentences' are not even complete sentences or thoughts. I stretched/distorted picture on the front should give an indication that this was not written or edited professionally. There are better books available. 4 of 4 people found the following review helpful. Wonderful handbook for those of us wanting to learn about ... By Mark Diekmann Wonderful handbook for those of us wanting to learn about the palms in our backyard! The pictures were great and I found it easy to search out the palm or the info that I was interested in.

About the Author Born in Welland and raised in Parry Sound Ontario Canada. Spend most of my time with my husband of 28 years at our 6 rescue dogs at our villa in Cabarete, Dominican Republic. I have 3 younger brothers, 3 sons and 5 grand children all living in the south western Ontario region. When I'm not writing or working on the website, I stay busy volunteering with a group called "Dogs and Cats of the Dominican Republic" I especially enjoy doing community outreach into the poorer areas where we can really make a difference for the people and their pets. We get back to Canada once a year to visit and catch up with family and friends. Our door is always open for them to escape the great white north during those long winter months and we look very forward to their visits. Looking forward to writing more books on palm trees in the future.
